- Ultimate convenience through easy setup
- Caller ID – so you always know who is calling
- Up to 16 hours of talk time
- 50-name phonebook

Eco-conscious product

- Low power consumption: < 0.65 W in stand-by mode
- Up to 95% reduction of emitted radiation in charging mode

PHILIPS

Cordless phone with answering machine
1000-series 3 handsets, White

CD1953W/38

Highlights

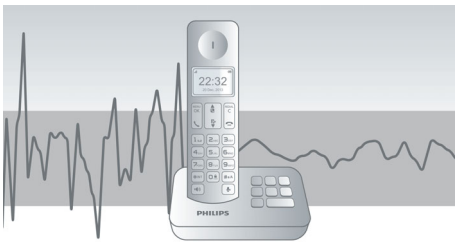
Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and handsfree modes.

Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Automatic Volume Control



Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

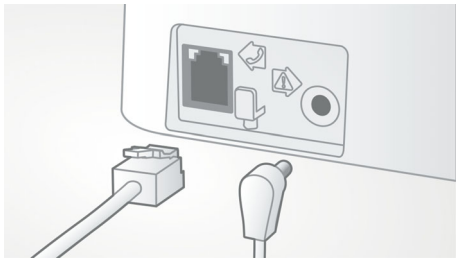
Up to 15 min. recording

With up to 15 minutes recording time, you'll never miss an important message.

4.1cm (1.6") display

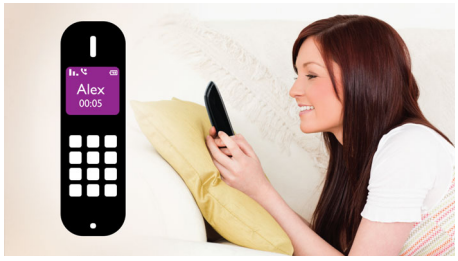
Easy to read 4.1 cm (1.6") display with amber backlight

Easy setup



Ultimate convenience through easy set up. Simplified installation - Plug & Play product

Caller ID



Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Low power consumption:< 0.65 W

Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in stand-by mode is less than < 0.65 W.
